"RAISED BUTTON"

General purpose batteries that are compatible with everyday electronics use the "Raised Button" type battery terminals. The other type of terminal is "Flat Top". This may not be compatible with some applications because the contact does not protrude from the battery casing enough. Please check. The templates below are a general guide for reference. Please note that the dimensions listed in the text *includes* the terminal height.

Please accept this as a *fast find* guide only. Calipers may prove much more reliable!

2V SEALED LEAD ACID CELLS

Highly reliable battery used in military, medical, security etc. In float, they last up to ten years before they fall to 80% of the rated capacity. Due to their low impedance, discharge current can be very high without risk of damage. They can be fully recharged in less than 1 Hr! using a constant V of 2.35 volts per cell, NO current limiting is required. Do not dry out and can be charged in any position. 2 VOLTS ea. MULTI-TYPE CRADLES

WHAT CHARGER DO I USE ?

See the cross-reference on 11-43 or look up your replacement battery on these pages and it will list the corresponding charger or adaptor.

See the associated Alpha Code that corresponds to your Battery. This Alpha code indicates which charger is suitable for that particular battery size and shape.

If your purchasing our battery then this charger is compatible with the battery chemistry type as well.

IS YOUR BATTERY NI-CD or NI-MH?

Very important as the charger must be compatible with your battery for maximum service life and usage.

CHARGER/CONDITIONERS Ni-Cd

Suitable for many early Video 8 & Suit VHS-C Palm / Camcorders Ni-Cd. (& our range of protected Ni-MH 11-27) These chargers will display the status of the battery, discharge the cells to the correct level and then recharge the battery to max capacity, shut-off & then chime to indicate its finished, and drop into trickle charge so the battery is always ready. Discharging is used for reducing memory effect. This can be bypassed for quick top-up charging. 240Vac@1A Power pack Inc. or 12VDC.
